

Weekly Progress Report – Week 2

Duration: 22 Sep – 28 Sep 2025

Project Title: Service Booking System

Team Members: Bhavya, Malhar, Jayesh, Shashank, Pratyush, Akshay, Hitiksha, Bhavika, Anjali

1. Summary of Tasks Completed

This week focused on preparing the Requirements Specification Document (BRD) and finalizing use cases.

The database schema for user, service, and booking modules was designed and reviewed.

The backend structure was initialized in Spring Boot.

Basic folder setup for React frontend was also completed.

The team discussed and documented initial API routes for user registration, authentication, and service management.

2. Roadblocks / Issues Faced

Some challenges in connecting PostgreSQL with Spring Boot during environment setup.

3. Upcoming Tasks / Plan for Next Week

- Implement basic user and authentication APIs in Spring Boot.
- Test database connectivity and CRUD operations.
- Create initial Docker configuration for containerizing backend service.
